SUMMARY

Full Stack Developer with 4+ years building web (React, Next.js), back-end (Node.js, NestJS, Python) and mobile (Flutter, React Native) products, plus AI systems with LLM agents and RAG. I currently automate payroll systems at TecnoRed, where I cut processing time by 85%, and maintain OSINT-D2, an open-source AI agent with 290+ GitHub stars.

EXPERIENCE

Full Stack Developer · TecnoRed — Mar 2026 – Present · Venezuela · On-site

- Automated payroll and settlement processing, cutting processing time by 85%.
- Built a microservice over client payroll databases with granular, per-client permissions.
- Own the leave and approval workflows for a large waste-collection company, and mapped the processes for a mass-payments portal.

Mobile App Developer (part-time) · Rolapro — May 2026 – Oct 2026 · Remote

- Built MVPs and iOS and Android apps for major national clients.

Lead Full Stack Developer (freelance) · Efisence Residence — Oct 2025 – Mar 2026 · Mexico · Remote

- Architected a residential IoT security ecosystem that connects physical hardware to an AI orchestration layer.
- Built LLM agents that automate visitor management and financial operations for 150+ units.

Frontend Web Developer · Crypto Portfolio — Mar 2025 – Oct 2025 · Remote

- Built a modular Next.js and TypeScript front end; cut First Contentful Paint by 40% with TanStack Query and a shared shadcn/ui component standard.
- Integrated Stripe subscriptions and real-time market data from CoinGecko and TradingView.

Mobile Developer · Deepcompany — Feb 2024 – Jul 2024 · Venezuela · Remote

- Built cross-platform Flutter apps with Clean Architecture for industry-leading pharmaceutical clients, focused on UX and performance.

Frontend Developer (freelance) · Over Group — Jul 2023 – Dec 2023 · Spain · Remote

- Built front ends with Flutter, Next.js, TypeScript and Tailwind CSS for crypto products.

Junior Developer · COLPIXTEC — Apr 2022 – Dec 2023 · Caracas · Hybrid

- Built the front end and back end of the EnviosFarma startup with JavaScript, PHP and MySQL.

PROJECTS

OSINT-D2 — Open-source creator · 290+ GitHub stars

AI agent that investigates a username or email across 20+ platforms, follows the leads it finds and delivers an evidence-based PDF dossier. Python, FastAPI, Playwright, Docker, Ollama; 547 tests.

Céflow — 5th of 22 teams, Platanus Hack 26 · 3rd in technical execution

3D dental planning in the browser, built from scratch in 36 hours with a team of five. React, Three.js, Web Workers, DICOM, Claude.

Andolimpio — andolimpio.angelcalderon.dev

Calculator that places a household in Venezuela's income distribution using the ENCOVI 2025 survey (UCAB), with a curve fitted to the 10 published decile averages. Astro, TypeScript.

AWARDS

5th place · Platanus Hack 26 Caracas: Céflow; 3rd of 22 in technical execution. 2026
2nd place · Codicon 2024 (Lexpin): Built the Born AI MVP in 48 hours. 2024
Honorable mention · Codicon Yummy: Mobile development challenge. 2023

SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, Astro, Tailwind CSS, shadcn/ui, TanStack Query
Backend: Node.js, NestJS, Express, Python, FastAPI, PHP, REST APIs, microservices
Mobile: Flutter, Dart, React Native, iOS, Android
Databases & cloud: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Google Cloud, Docker, Vercel, Linux, Git
AI: LLM agents, RAG, OpenAI, Claude, Ollama, DeepSeek
Languages: Spanish (native), English (professional, C1)

EDUCATION

Computer Engineering, Universidad Católica Andrés Bello (UCAB) — 2024 – Present
Systems Engineering, UNEXPO — 2020 – 2024
